PROFILE

- Production-disciplined graphic designer with 15+ years of experience in advertising and commercial print, covering the full production lifecycle – from concept and layout to technically clean, press-ready artwork – for sheet-fed offset, and large-format printing. Work spans books, periodicals, advertising, outdoor, in-house and promotional materials.
- Since mid-2025, self-directed into generative AI for visual content: built a brief-to-final-asset pipeline – AI-generated image and video, prompt engineering, audio sync. A workflow that extends rather than replaces the classical design process.
- Interested in graphic design, architecture, interior and furniture, motion design and animation, and video editing.

CORE COMPETENCIES

- Design & print production, editorial layout, branding and visual identity, typography, composition and visual hierarchy, advertising and outdoor layouts, promotional merchandise design. Prepress, colour management, bleed and trim setup, print house liaison, colour proofing.
- Generative AI image creation, AI video generation, prompt engineering, brief-to-final-asset AI workflow, audio/music syncing for AI video, social and digital content formats, content generation.

SOFTWARE

- Solid practical background in Adobe Photoshop, Adobe InDesign, Adobe Illustrator, Microsoft Office.
- Since 2025 focus on generative AI tools for image, video, and text, including Claude, ChatGPT, and Higgsfield.ai.
- Hands-on proficiency with design and video editing software (applied in personal and spec projects): CapCut, Adobe Premiere Pro, Adobe After Effects.
- Familiar with Figma.

LANGUAGES

- English is used regularly in professional work – professional working proficiency in written English, conversational in spoken.
- Bulgarian – native.

PROFESSIONAL EXPERIENCE

Design Specialist and AI-Assisted Content Creator – Self-Directed

Stara Zagora, Bulgaria | August 2025 – Present

- Developed end-to-end AI visual content workflow, combining prompt engineering, AI image/video/text generation, editing, and sound design, including an entry to the Higgsfield AI Video Contest (2026).
- Created 20+ AI short-form videos across different genres.
- Experimented using Claude Pro for AI-assisted ideation and developed an Android cooking app combining UX/UI design with AI workflow. The app is currently in Google Play closed testing and has not yet been released to production.
- Developed concept visuals for my portfolio and curated a selection of professional achievements and completed visual design projects, which I brought together into a personal website.
- Became part of SoftUni Circle platform for AI as a moderator.

Graphic Designer – DMI Development

Sofia, Bulgaria | June 2023 – July 2025 (2 yrs 2 mos) | 20–50 employees
